AHCPMG311—Use Firearms for Pest Control Activities from Aircraft

This unit of competency describes the skills and knowledge required to conduct pest control activities from the air using firearms. This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with the relevant statutory requirements. Workers operating in this field are required to hold a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory. Firearms licensing conditions apply to this unit. Specific determination should be sought through the relevant State or Territory agency. Appropriate firearms licences are also required for those involved in training and assessment against this unit. Approval to carry and discharge firearms from aircraft must be gained from the Civil Aviation Safety Authority (CASA). The holder of an Air Operator's Certificate is responsible for gaining this approval and personnel involved must ensure such an approval is issued and comply with any conditions specified in the approval documentation.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.
