

AHCPMG311

Use firearms for pest control activities from aircraft

DESCRIPTION

This unit of competency describes the skills and knowledge required to conduct pest control activities from the air using firearms.

The unit applies to individuals who hold a valid firearms license and work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Destruction of pest animals must comply with state animal cruelty legislation. In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

OVERVIEW

This course is delivered in a face to face workshop format incorporating knowledge-based theory assessment and field practical assessment activities conducted over a one to two-day period depending on the knowledge, skill, current licensing and competency of participants.

PREREQUISITE UNITS

Nil—However students should have a genuine occupational need and be a fit and proper person for the regulated use of poison for vertebrate pest control per State/Territory legislation.

EDUCATION PATHWAYS

AHC31416 - Certificate III in Conservation & Land Management

AHC30318- Certificate III in Rural & Environmental Pest Management.
